DMPLO or PLDMO

FRONT FOOT NAVICULAR BONE

60 – Degree DP of foot using navicular bone technique

Skyline/Flexor view of navicular bone

FETLOCK: (Front and Hind)

Lateral to medial

REPOSITORY RULES

NRHA has established an online repository with *Asteris* where consignors will submit digital radiographs to be viewed by interested parties. Additionally, there will be an onsite Repository viewing area during the NRHA/Markel Futurity Sales.

All digital radiographs must be submitted to the *Asteris* repository and no information may be removed from the repository for any reason whatsoever.

No one is allowed to enter the onsite repository unless accompanied by a licensed veterinarian. Log in credentials for the online repository are available for any licensed veterinarian (not limited to the US).

No copies or electronic transmission of any digital radiographs contained within the repository will be submitted to anyone.

Note: Results of Radiographs are not a consideration for sale entry. Radiographs are not expected to prove an animal “perfect”; this practice merely allows interested parties the opportunity to make decisions based on information made available.

****The NRHA does not view radiographs, nor do the results determine entry into a sale session and results will not be announced.**
